DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 16, 18, 30, 31, 45, 46, and 58 are rejected under 35 U.S.C. 102(b) as being anticipated by Lund (U.S. Patent 5,946,684).

Regarding claims 1, 18, 31, Lund teaches a method and system for providing computer-network related information about a calling party, wherein when a calling party calls a subscriber, telephone number of the calling party is sent to a called party, computer-network address is retrieved, and calling party customized information ("user profile information") is presented to the subscriber on the subscriber's Customer Premise Equipment (col. 3, line 54 through col. 4, line 30); provisioning a trigger on the subscriber's telephone line at a service switching point (SSP 248); receiving a call from a caller (Fig. 2, 232) to the subscriber (Fig. 2, 252) at the service switching point; sending a query to a service control point (SCP 242) in response to the trigger; the SCP 242 indexes the database 243 to obtain and transmit the relevant information associated with the calling party's telephone number (col. 4, lines 13-24) and display information customized by the calling party ("enhanced caller information") to the subscriber (col. 3, lines 35-52).

Art Unit: 2642

Regarding claims 16, 30, 45, and 58, Lund teaches the server is accessible by the subscriber via a wireless (col. 7, lines 9-17).

Claim 46 is rejected for the same reasons as discussed above with respect to claim 18. Furthermore, Lund teaches customer premise equipment includes cellular phones with data display, therefore, it would anticipate the mobile switching center in order to provision with the subscriber's cellular phone.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 5, 6, 8, 10, 11, 14, 15, 24, 26, 27, 34, 35, 38, 40, 41, 44, 52, 54, and 55 and are rejected under 35 U.S.C. 103(a) as being unpatentable over Lund (U.S. Patent 5,946,684) in view of Bushnell (US 2002/0067816 A1).

Regarding claims 5, 6, 8, 10, 24, 26, 34, 35, 38, 40, 52 and 54, Lund does not teach the user profile information comprises a multimedia document, a graphical file, and a map showing the caller location.

Bushnell teaches the caller profile include multimedia content, graphical file and a map ("images"), text information (Abstract and page 1, [0009]).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate the features of the user profile information comprises a multimedia document, a graphical file, and a map showing the caller location, as

Art Unit: 2642

taught by Bushnell, in Lund's system in order to have an enhanced list of caller information to present to the subscriber.

Regarding claims 11, 14, 27, 41, and 55, Bushnell teaches the server ("caller profile database server - CDPS") is a web server accessible via the Internet or an interactive voice response server (Fig. 2, 214 - page 1, [0009]).

Regarding claims 15 and 44, Bushnell teaches receiving a username and a password on the server before providing the enhanced caller information to the subscriber (page 9, [0071]).

5. Claims 2-4, 7, 9, 12, 13, 16, 17, 19-23, 25, 28, 29, 32, 33, 36, 37, 39, 42, 43, 47-51, 53, 56, and 57 and are rejected under 35 U.S.C. 103(a) as being unpatentable over Lund (U.S. Patent 5,946,684).

Regarding claims 2-4, 7, 9, 19-23, 25, 32, 33, 36, 37, 39, 47-51, and 53, Lund teaches information associated with the calling party's telephone number (col. 4, lines 15-24). However, Lund does not explicitly suggest calling name, date, time, and location, call length, and stop time. It would have been obvious that information associated with the calling party's telephone number would also contain information such as: calling name, date, time, location, call length, and stop time.

Regarding claim 12, 13, 17, 28, 29, 42, 43, 56, and 57, Lund does not teach the server is a file transfer protocol server, and email server; the user profile information comprises an access rights list. It would have been obvious to one of ordinary skill in the art that file transfer protocol server and email server that are accessible via the

Internet are well known in the art and the advantages of using them are also well known.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Quynh H. Nguyen whose telephone number is 703-305-5451. The examiner can normally be reached on Monday - Thursday from 6:30 A.M. to 5:00 P.M.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ahmad Matar, can be reached on (703) 305-4731. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-305-4700.
